Shell Scheme & Electrics Layout Planning & Placement

On the grid, please show the size of your stand, the open sides and where you want the items located. Please ensure that you clearly identify the show and your stand number. Please all bear in mind that shelves and sockets can only be positioned against a wall in a shell scheme. For Electrical sockets, please identify what you intend to use the socket for so that we can check that the electrical supply will be adequate for your needs.

One square represents 0.5 metre.

Where appropriate, (eg for sockets and shelves), please specify heights from floor level. Lighting will be mounted on the ceiling grid unless otherwise specified.

SHOW _____
STAND NUMBER _____
STAND NAME _____

D = Spotlight
W = Power Socket
[===] = Fluorescent light (draw to length chosen)

Shelves, etc. - mark position and note what each item is

What do you plan to plug into your socket? _____
